Eugenics In Canada: 20% Of Babies Aborted In “Pro-Choice Movement”

Ever wonder just how much of the Canadian public has been lost due to “abortion” in recent decades? Considering the size and scale of this, it must be good business.

According to a compilation of data from the Federal Government, approximately 20% of pregnancies have ended in abortion. Of course, this relies on transparent reporting, so the number could be much higher. These totals exclude miscarriages and stillbirths.

For a good source on this data, visit Love4Life. There is a considerable amount of statistical data compiled, and it connects back to official Government sources.

Now, there are going to be some discrepancies in the data. This is partly because of incomplete reporting, and also because some sources have different numbers. Nonetheless, it should paint the picture quite gruesomely.

Let’s drop the spoiler here: there were over 4,222,858 abortions between 1970 and 2020. This isn’t a joke. Our “pro-choice” supporters and policies have literally killed millions of Canadians.

It’s also quite interesting that many of the same people are behind two (seemingly) opposing ideologies within Western countries. Then again, population replacement is just some racist conspiracy theory.

[1] Promote widespread abortion locally
[2] Promote mass immigration to counter falling birth rates

Anyhow, let’s look at some of these numbers:

2018	85,294
2019	83,576
2020	74,155

**Note: data is combined from CIHI and Statistics Canada. The Canadian Institute for Health Information does have considerable recent data on abortion in this country.

*2010 is considered incomplete, since there wasn’t reporting from Quebec.

The Abortion Rights Coalition of Canada also compiles recent statistics on abortion numbers here. (see archive). It’s actually pretty morbid to think about.

According to Statistics Canada, there were 1,375,774 abortions between the years of 1987 to 2000. This is a span of 14 years, and showed an average of about 98,000 abortions per year. This amounted to some 263 performed per day.

If we factor in the data from 1970 to 2020 (data from a few different tables), there were 4,222,858 abortions. This covers 51 years, and would be approximately 86,000 per year. Converted into daily totals, that means roughly 227 babies would have died, every single day.

Don’t worry, it’s about to get a lot more disgusting when the ages of the girls and women are taken into account. There are an awful lot of children getting abortions.

YEAR	ABORTIONS	UNKNOWN	UNDER 15	15 TO 17	18 TO 19
1974	52,435	0	623	7,937	7,868

2006	91,310	156	267	5,608	9,609

Data available from Statistics Canada: 1987 to 2000. Another version, which goes from 1974 to 2006, is also available. There are a few discrepancies, but the total is still shocking.

It’s also worth pointing out that starting in 1994, there were large numbers of women getting abortions for which there was no age listed. Just a hunch, but most of them were probably either in the country illegally, or didn’t want to disclose that they were minors.

Also, these are just “official” statistics. It’s very likely that there are a lot more abortions that have gone on, and are unreported. And recently:

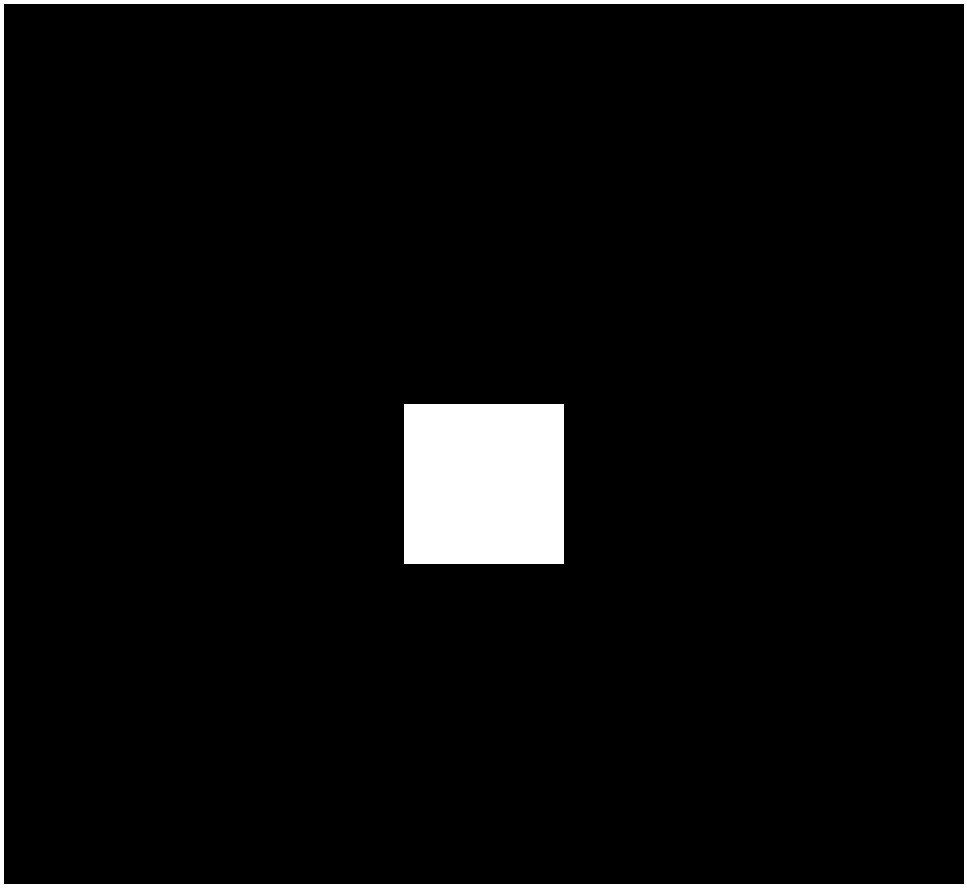
induced-abortion-can-2015-en-web
induced-abortion-can-2016-en-web
induced-abortion-2017-en-web (1)
induced-abortions-reported-in-canada-in-2018-updated-data-tables-en-web
induced-abortions-reported-in-canada-in-2019-en (1)
induced-abortions-reported-in-canada-2020-en

There were 100,104 abortions reported in 2015.
There were 97,764 reported in 2016.
There were 94,030 reported in 2017.
There were 85,294 reported in 2018.

There were 83,576 reported in 2019.

There were 74,155 reported in 2020.

But don’t worry. There are no doubt countless politicians and public figures working diligently to reverse this trend, right?



00:00 00:40

70. Abortion Legislation

A Conservative Government will not support any legislation to regulate abortion.

71. Euthanasia

The Conservative Party will not support any legislation to legalize euthanasia or assisted suicide.

The Conservative Party of Canada opposes the extension of euthanasia and assisted suicide (MAID) to minors, to people who are not competent and people who live with psychological suffering.

And what do “conservatives” in Canada have to say about this? They don’t seem to care about the millions who’ve died as a result of abortion. There’s no ideological issue with infanticide in general. However, they insist that babies not be killed simply because of their sex. This was Bill C-233, a Private Member’s Bill in the last session.

There are also major demographic implications for abortion on this scale, which needs to be addressed as well.

The topic of births and deaths is certainly important to consider. That said, including abortion — especially being so widespread — changes the dynamics considerably.

Note: Difference = Live Births – Total Deaths

Note: Per Day = (Difference)/365 or 366

Year	Birth	Deaths	Diff	Day
1991	402,533	195,569	206,964	567
1992	398,643	196,535	202,108	552

2005	342,176	230,132	112,044	307
2006	354,617	228,079	126,538	347
2007	367,864	235,217	132,647	363
2008	377,886	238,617	139,269	381
2009	380,863	238,418	142,445	390

2010	377,213	240,075	137,138	376
2011	377,636	243,511	134,125	367
2012	381,869	246,596	135,273	370
2013	380,323	252,338	127,985	350
2014	384,100	258,821	125,279	343
2015	382,392	264,333	118,059	323
2016	383,102	267,213	115,889	318
2017	379,450	276,689	102,761	281
2018	375,390	283,706	91,684	251

A few years back, it was covered how Canada had a growing population even without immigration. In fairness, it’s not clear how much of this was due to birth tourism. However, the rates weren’t plummeting as people were led to believe.

A quick and dirty estimation (based on births and abortions) would be that approximately 20% of the pregnancies — excluding miscarriages — ended up being aborted. This translated to 1 in 5.

YEAR	BIRTHS	ABORTIONS	B + A	% ABORTED
1991	402,533	95,059	497,592	19.1%
1992	398,643	102,085	500,728	20.3%
1993	388,394	104,403	492,797	21.2%
1994	385,114	106,255	491,369	21.6%
1995	378,016	108,248	486,264	22.3%
1996	366,200	111,659	477,859	23.3%
1997	348,598	111,709	460,307	24.3%
1998	342,418	110,331	452,749	24.4%

1999	337,249	105,666	442,915	23.8%
2000	327,882	105,427	433,309	24.3%

2003	335,202	103,768	438,970	23.6%
2004	337,072	100,039	447,111	22.4%
2005	342,176	96,815	438,991	22.0%
2006	354,617	91,310	445,927	20.5%
2007	367,864	98,762	466,626	21.2%
2008	377,886	95,876	473,762	20.2%
2009	380,863	93,755	474,618	19.8%
2010	377,213	*64,641	441,854	*14.6%
2011	377,636	108,844	486,480	22.3%
2012	381,869	100,958	482,827	20.9%
2013	380,323	102,446	482,769	21.2%
2014	384,100	100,194	484,294	20.7%
2015	382,392	100,104	482,496	20.7%
2016	383,102	97,764	480,866	20.3%
2017	379,450	94,030	473,480	19.9%
2018	375,390	85,294	460,684	18.5%
2019	375,229	83,576	458,805	18.2%
2020	361,667	74,155	435,822	17.0%

*2010 is skewed, since Quebec didn’t fully report their totals.

This isn’t hyperbole to claim that 20% of pregnancies in recent years end with an abortion. Slaughtering large segments of future generations has been happening for decades.

Again, 4,222,858 abortions between 1970 and 2020, and that’s just Canada. Also, these are just the official figures. Factoring in the unreported, the number is likely much higher.

Don’t worry about the falling birth rates and the slaughter of Canadian children. After all, we can just import a replacement population in order to keep up.
